

PATRICK OFORI-SAMPONG

SOC Analyst | Threat Detection | Incident Response |

Psampong18@gmail.com | 0244469378 | [linkedin.com/in/patrick-ofori-sampong](https://www.linkedin.com/in/patrick-ofori-sampong)

PROFILE SUMMARY

Certified Cybersecurity enthusiast with a passion for and deep interest in offensive security development and vulnerability research and security testing. A fast learner and quick thinker, with excellent analytical, problem-solving, and communication skills. Eager to find a role that will allow me to apply and expand my knowledge of penetration testing and network security. Founder of a successful boundary-pushing creative studio creating interactive and generative art installations and sustainable 3D printing.

TOOLS

• Kali Linux • Python • Wireshark • NMAP • Metasploit • SQLMAP • Suricata •

TECHNICAL SKILLS

- Incident Response: Experienced in the full incident response lifecycle, including threat detection, containment, eradication, and recovery.
- SIEM Tools: Proficient in working with Security Information and Event Management (SIEM) tools, leveraging log analysis and event correlation to identify and investigate security incidents in real-time.
- Threat Intelligence: IOC analysis, attack detection, practical experience in applying threat intelligence to enhance detection, response, and proactive defense strategies.
- Network Security: TCP/IP, DNS, HTTPS protocols, firewall rules
- Phishing Analysis: Email header inspection and malicious link analysis. Knowledgeable in preventive strategies and user awareness training.
- Soft Skills: Communication, Critical Thinking, Team Collaboration, Problem Solving

PORTFOLIO

- **Incident Response Playbook:** Created a comprehensive response plan using the NIST Cybersecurity Framework (Detect, Respond, Recover). Outlined detection strategies, containment protocols, and recovery actions.
- **Network Security Assessment:** Conducted vulnerability scans with Nmap; identified open ports and weak configurations. Applied CIA Triad principles to protect confidentiality and prevent data loss.
- **DNS Traffic Analysis & Threat Detection:** Investigated DNS queries for anomalies such as spoofing and tunneling. Recommended configurations to prevent DNS hijacking and strengthen domain security.
- **Network Reconnaissance:** Used Nmap, Zenmap, and Airodump-ng to identify open ports, services, and devices on target networks.
- **Analyze Real-Time Network Traffic:** Monitored and dissected suspicious network behavior using Wireshark, detecting ARP poisoning and unencrypted data leaks
- **Wireless Threat Detection:** Simulated brute-force attacks on Wi-Fi to study intrusion patterns and log correlation.

- **Website & Database Monitoring:** Simulated SQL injection to identify system weaknesses and improve detection mechanisms.
- **ARP Spoofing Detection:** Used Bettercap and Suricata to analyze MITM attack patterns and alert configurations.
- **Password & Hash Security Review:** Used Hashcat and John the Ripper to simulate password attacks and improve password policy.
- **Post-Incident Analysis:** Investigated backdoor and reverse shell artifacts using Wireshark and system logs to detect compromise.
- **Cybersecurity Automation with Python:** Developed Python scripts to automate cybersecurity tasks, enhancing efficiency in threat detection.

CERTIFICATIONS

- GOOGLE CYBERSECURITY
<https://coursera.org/share/7c5b25fa9cada17253bd49de89e966fb>
- PYTHON PROGRAMMING
<https://www.udemy.com/certificate/UC-b372e539-22b4-4c7e-bf4d-be09758579d0/>
- REAL ETHICAL HACKING WITH PYTHON | PYCEH+

EDUCATION

BACHELOR OF SCIENCE: PETROLEUM ENGINEERING (2016-2020)

Kwame Nkrumah University of Science and Technology

- Project: Field Development Plan

Developed a detailed 3D reservoir simulation model using industry-standard software (e.g., Petrel and Eclipse) to analyze reservoir performance and predict future production behavior.

WORK EXPERIENCE

INTERACTIVE AND GENERATIVE ARTIST (2022 - CURRENTLY)

Grey Area Studios Ghana

- Created generative visuals and interactive installations using TouchDesigner for exhibitions and live shows.
- Programmed real-time audiovisual systems that respond to audio, motion, or sensor input.
- Designed and deployed immersive media environments using TouchDesigner, integrated with hardware (e.g., Kinect, MIDI controllers).
- Utilized creative coding to develop data-driven visual art and real-time effects.

PETROLEUM ENGINEER (SEPT 2020 - AUG 2021)

Petroleum Commission Ghana

- Received training under; Reservoir, Drilling, Production, Health, Safety and Environment.
